Portfolio: <https://personal-two-psi.vercel.app>

Profile

I work with a modern stack to build web applications and services: designing architecture, implementing both frontend and backend, integrating AI solutions. Experienced in developing systems for logistics and business process automation. Open to new challenges and teamwork.

Key Skills

Frontend: React, Vite, Next, TypeScript, React Router, MobX, Redux, Tailwind CSS, i18n.

Backend/Basics: C#, .NET, REST API, NestJS

Tools: Git, ESLint/Prettier, npm, Vercel, GitHub Pages.

Other: XML/CSV/JSON, Figma.

Languages: Russian — native · Latvian — B2 · English — B1 (read documentation, chat communication).

Projects

Personal Ops Center

Fullstack microservices platform: Next.js, NestJS, TypeScript, PostgreSQL, Railway

GitHub: <https://github.com/lakovYakovlev/personal-ops-center.git>

DocSense API (.NET)

Backend for intelligent document processing: ASP.NET Core, EF Core, PostgreSQL, Docker

GitHub: <https://github.com/lakovYakovlev/DocSensePublic.git>

Work Experience

SIA “Cargo Concept” — Logistics / Software Specialist

January 2015 — present

Commercial development experience: 5+ years (combining logistics duties with creating internal software solutions).

- Developed and maintain an internal web system for the warehouse: C#/.NET (REST API) + TypeScript/React 18 (MobX).
- Implemented modules: receiving/shipping, pallet and cell management, barcode scanning, reporting.
- Set up data exchange integrations (XML/CSV/JSON) with internal and external systems.
- Automated routine operations, reduced manual input and errors; sped up processing and improved transparency of statuses.

Education

Transport and Telecommunication Institute (TSI) — Business and Transport Logistics

Graduation year: 2012

Contact

I'll be glad to discuss projects, ideas, and collaboration opportunities.
