# Yakov Yakovlev

**Fullstack Developer (.NET / React / TypeScript)**

**Contacts:**

- **Phone:** +371 25375678
- **Email:** j.jakovu@gmail.com
- **GitHub:** github.com/IakovYakovlev
- **Portfolio:** personal-two-psi.vercel.app

---

## PROFESSIONAL SUMMARY

Fullstack Developer with **5+ years of commercial experience** in designing and building web applications and enterprise software. Specialized in end-to-end architecture (migrating legacy systems to modern **.NET 8** and **React 18 / Next.js** stacks), designing RESTful APIs, crafting intuitive user interfaces, and automating complex logistics domain workflows.

---

## KEY SKILLS

- **Frontend:** React 18, TypeScript, Next.js (App Router), Redux Toolkit, MobX, Tailwind CSS, HTML5/CSS3.
- **Backend:** C#, .NET 8 / 10, ASP.NET Core, REST API, Microservices (NestJS).
- **Databases & Queues:** PostgreSQL, Entity Framework Core, Prisma, Redis, BullMQ.
- **Tools & DevOps:** Git, Docker, Vercel, Railway, Swagger, ESLint/Prettier.
- **Languages:** Russian (Native), Latvian (B2), English (B1 — technical documentation & professional correspondence).

---

## WORK EXPERIENCE

### SIA “Cargo Concept” — Software Developer / Fullstack Developer

*January 2015 — Present (5+ yrs commercial software dev)*

- **WMS Development (Solo):** Architected and built a custom warehouse management web platform from scratch (**C# .NET 8 API / TypeScript / React 18 / MobX**), replacing an outdated Navision 2000 legacy desktop solution. Eliminated costly licensing fees, added critical missing features, and significantly boosted warehouse order processing speeds.
- **End-to-End Functionality:** Implemented core cargo tracking modules (receiving/shipping, bin-location management, barcode scanning, analytics reporting), delivering an optimized UX for warehouse personnel.
- **Integrations & Automation:** Established reliable asynchronous data exchange pipelines (XML, CSV, JSON) with external logistics software, eliminating manual data entry and preventing inventory record errors.

---

# PROJECTS

## Personal Ops Center — Distributed Microservice Ecosystem & AI Assistant `(In Progress)`

**GitHub:** github.com/IakovYakovlev/personal-ops-center

- **Architecture:** 5-microservice hybrid backend (**NestJS + .NET 10**) with a unified JWT security layer and asynchronous task processing via **BullMQ & Redis**.
- **Implementation:** Built `Identity Service` (Auth) and `Doc Intelligence` (PDF/DOCX parsing engine). Currently implementing `Neural Assistant` (RAG system with Google Gemini Pro for semantic document retrieval).
- **Stack:** Next.js 16 (App Router), TypeScript, NestJS, ASP.NET Core 10, PostgreSQL, Prisma, EF Core, BullMQ, Redis, Google Gemini Pro, Tailwind CSS.

## DocSense API — Backend for Intelligent Document Processing

**GitHub:** github.com/IakovYakovlev/DocSensePublic

- **Overview:** High-performance REST API designed to analyze, extract, and structure raw text documents.
- **Stack:** ASP.NET Core, Entity Framework Core, PostgreSQL, Docker, Swagger.

---

# EDUCATION

**Transport and Telecommunication Institute (TSI)** — Business & Transport Logistics *(Graduation Year: 2012)*
